Monday - Friday: 8 a.m. – 5 p.m.
Other times by appointment

**HARLEY SMITH,
COORDINATOR**

Message from the Coordinator

What a wonderful Summer it has been at the Fulford Center! We were able to welcome over 100 kids to the center for a variety of camps. At the beginning of Summer some of the COVID-19 restrictions were lifted which allowed us to take away room capacity numbers and allow more children to attend camps. The children loved each camp and wished they wouldn't end! I would like to thank all the parents who trusted us to spend some of your child's summer with them. It was wonderful to have so many young, smiling faces back at the Fulford Center! I would also like to thank our many volunteers. Without their help, these camps would not have been possible! Thank you for a wonderful Summer!

Fulford Summer Camp Review 2021

Art Camp

To kick off the 2021 summer camps, the Emanuel Arts Council hosted an art camp June 7-9, 2021. Twenty camp scholarships were given to 3-5 graders to participate in the camp. These scholarships were made possible through a grant from the Mill Creek Foundation.

The annual camp focused on drawing, painting, and creativity! Campers learned about tempera paint, intensity by way of color saturation, focus on details, and much more.

Jacque Brasher, the executive director of the Emanuel Arts Council, along with assistants Susanna Hall and Anita Cerpovicz assisted Mark Lillquist, the art camp instructor, with the camp.

Discovery STEM Camp

Magnolia Midlands Georgia Youth Science and Technology Center (GYSTC) hosted its annual STEM Discovery Camp at the Fulford Center. The camp was held for rising 3rd through 5th graders. Students participated in various STEM activities throughout the week with an emphasis on STEM careers.

Instructors for the camp were Erin Youmans, GYSTC Coordinator, and Kim Hooks, GYSTC part-time STEM teacher.

Camp Invention

Camp Invention, a nationally recognized program of the National Inventors Hall of Fame®, has been a popular summer destination for young people across the country and has been held at the Fulford Center for the past nine years.

The camp challenges students to find their "inner inventor" by learning the process of innovation and promoting STEM (science, technology, engineering, and mathematics) learning. In addition, the camp builds confidence, leadership, perseverance, and problem-solving skills.

Harley Smith, the Fulford Center Coordinator, served as the lead coach for this year's experience. Erin Youmans, MMGYSTC Coordinator, Macy Fagler, Swainsboro Primary teacher, and Kim Hooks, MMGYSTC STEM Teacher, served as coaches for the three groups of campers. Nordson Corporation very generously provided fifty scholarships for rising third through sixth graders to attend the camp and has served as a corporate sponsor each year.
